### Terrestrial Exposure Rate $\mu\text{R/hr}$

The estimated terrestrial exposure rate at 1 m AGL data are presented. The total gamma count rate has been corrected for nominal airborne radon and converted to an exposure rate at ground level from the radiation detection system data taken at various altitudes over the same terrain.

**Flight Parameters**  
Altitude 1200 ft, Spacing 1000 ft  
Speed 140 knots

This map was produced by the Aerial Measuring System section of NNSA's Remote Sensing Laboratory (RSL) at Nellis AFB, Las Vegas, Nevada.

**Map Scale: 1:10,000**
